Game Media, Student, Local Food, Knowledge

Abstract

Banten Province has many local food, such as corn, Aren, and milkfish. The benefits of these local food is still largely unknown by school students in Banten Province. The developed of game interactive with local food content can be an interesting way as teaching learning media. The research aimed to produce learning media for students in improving local food knowledge in Banten Province through interactive game. The research methods conducted was research and development (R&D), through steps: potential problems identification, collection of data, design, validation, revision, product trial, product revision, then field trial use to students, and final revision. This research has just produce the design of game media. The game content developed by questions or problems to be answered by the students about local food. The game itself called JABANREN interactive game, it was abbreviation for "JA" means JAGUNG (corn), "BAN" means BANDENG (milk fish), and "REN" means AREN (Aren).
