We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Dietary Supplementation of *Bacillus* NP5 as Probiotic on Growth, Response Immune and Resistance to *Aeromonas hydrophila* Infection of African Catfish, *Clarias gariepinus*".

Our decision is: Revisions Required

Note: Kindly invite professional proofreader prior to resubmission your revised paper.

This manuscript deals with the potential use of *Bacillus* NP5 as a probiotic in the *Clarias gariepinus* diets and its effects on growth performance, nutrient digestibility, immune response, and resistance to *Aeromonas hydrophila* infection. The manuscript has major concerns that need to be addressed as follow:

- 1- There are many long sentences, grammatical and styling errors. Thus, English editing is highly recommended.
- 2- Title should be corrected as follows "Dietary *Bacillus* NP5 Supplement Impacts on Growth, Nutrient Digestibility, Immune Response, and Resistance to *Aeromonas hydrophila* Infection of African Catfish, *Clarias gariepinus* (Burchell, 1822)".
- 3- Table 1: NFE is wrongly calculated, please revise. Add the equation of the NFE (%) in the table footnote. Replace " Dry weight " with "Dry matter (%)".
- 4- Justify the dose selection of *Bacillus* NP5. How many CFUs are for *Bacillus* NP5?
- 5- Lines 66 and 86: delete "(g/100 g) "
- 6- Line 95: replace " Perameter " with " Parameters"
- 7- Lines 108-109: specify the intestinal part analyzed.
- 8- Lines 126 and 137: "107" please superscript 7.
- 9- Line 139: specify which type of ANOVA did you used?
- 10- Results section:
  - Line 141: delete "AND DISCUSSION"
  - Lines 155-159: final weight has been not described.
  - Line 169: replace " Immune response" with " Hematological and immunological response"
- 11- Discussion: The authors need to start the discussion with digestive enzymes then digestibility to correlate the enhanced nutrient digestibility to the digestive enzyme's findings.

Recommendation: Revisions Required
